The Jaguar I-PACE HSE stands as a landmark in the evolution of luxury electric vehicles, combining the brand's storied performance heritage with a forward-thinking powertrain. This specific example, finished in a sophisticated Corris Gray Exterior with a rich Black Leather Interior, is an exceptionally rare find due to its remarkably low usage. Originally retailing for a premium price point, it represents a top-tier configuration of the award-winning all-electric SUV that swept multiple world car honors. Performance This vehicle is powered by two permanent magnet synchronous electric motors that deliver substantial horsepower and instant torque. The advanced all-wheel-drive system and low center of gravity—thanks to the under-floor battery placement—allow for a rapid sprint to highway speeds. Standard air suspension and Adaptive Dynamics ensure a ride that is both pillowy and precise, while selectable regenerative braking modes allow for efficient one-pedal driving in city traffic. Design The I-PACE features a radical "cab-forward" design that maximizes interior room while maintaining a sleek, aerodynamic profile. The Corris Gray finish highlights the muscular haunches and the dramatic curve of the hood scoop, which is designed to channel air over the roof for improved efficiency. The HSE trim is further distinguished by diamond-turned wheels with gloss dark gray contrast and signature LED headlights that provide a sharp, modern face to the vehicle. Technology Inside, the Touch Pro Duo infotainment system utilizes dual high-definition touchscreens to manage vehicle functions, from navigation to the Meridian Surround Sound System. A digital interactive driver display replaces traditional gauges, offering customizable views of range and performance data. This model includes a heads-up display and is fully compatible with smartphone integration, ensuring that the cabin remains a cutting-edge digital hub for all occupants. Advanced Safety Features Safety technology is comprehensive, featuring a surround camera system that provides a bird's-eye view for effortless maneuvering. The Driver Assist Pack includes adaptive cruise control with steering assist, high-speed emergency braking, and blind-spot assist to maintain a protective bubble around the vehicle. Additionally, lane-keep assist and a driver condition monitor work silently in the background to ensure peace of mind on longer journeys. Convenience and Comfort The cabin is an oasis of luxury, featuring Windsor leather front sports seats that are both heated and cooled, paired with heated rear seating. A fixed panoramic glass roof floods the interior with natural light, while the cabin air ionization system ensures a fresh atmosphere. For cargo, the absence of a traditional engine allows for a front storage compartment and a generous rear trunk, while the "floating" center console provides clever storage solutions for personal items within easy reach. Here at Jaguar Land Rover Schaumburg, we appreciate the opportunity to earn your business. This begins by being 100% committed to putting our customers first and offering complete transparency with every transaction. Please call us at (847)-252-7800 and ask to speak with one of our Sales Guides

and we will be happy to provide you with any additional information you need to make your decision. We look forward to serving you and welcoming you to the Jaguar Land Rover Schaumburg family.
